## SUMMARY

DevOps & Cloud Engineer with 4+ years of experience in AWS, CI/CD, Infrastructure as Code, Kubernetes, and cloud automation. Skilled in Terraform, Jenkins, Docker, Helm, and Argo CD, with a proven track record of optimizing workflows, accelerating test execution by 30%, and reducing data analysis effort by 90%.

## TECHNICAL SKILLS

**Programming & Scripting:** Python, Bash

**Cloud:** AWS (EC2, S3, Lambda, VPC, IAM, EKS, DynamoDB, CloudWatch, API Gateway)

**Infrastructure as Code:** Terraform

**Containerization & Orchestration:** Docker, Kubernetes, Helm

**CI/CD & GitOps:** Jenkins, ArgoCD

## PROFESSIONAL EXPERIENCE

### Qualcomm

December 2025 – Present

Senior Engineer

Bangalore, India

- Engineered and automated **AWS**-based RF test execution workflows, reducing test setup and execution time by **30%**, and enabling faster validation cycles for RF software releases.
- Implemented version-controlled **Kubernetes** deployments using **Argo CD** and **Helm** that streamlined deployment across environments and reduced deployment time by 70%.
- Automated cloud infrastructure using **Terraform** along with **Jenkins**, reducing environment setup time by **50%**.
- Enhanced monitoring for multi-tier AWS application by using **Grafana** for creating dashboards with metrics collected from **Prometheus** and **CloudWatch**.
- Mentored interns and junior engineers on cloud application provisioning, debugging and troubleshooting

### Qualcomm

August 2022 – November 2025

Engineer

Bangalore, India

- Collaborated** with cross-functional engineering teams across US, UK and Taiwan to support software development, integration and validation across multiple Qualcomm chipsets.
- Developed **Python**-based automation tools and scripts to improve regression testing and test coverage.
- Built an end-to-end data processing and analysis reporting workflow using **Jenkins** CI pipeline and **Python**-based tools enabling faster interpretation of test results across engineering teams, reducing the time by 90%.
- Developed device drivers enabling automated interaction between test software and RF/Bluetooth testing hardware.

### AWS

January 2022 – July 2022

Solution Architect Intern

Bangalore, India

- Designed and implemented multi-layer AWS VPC architecture using API Gateway, Lambda, DynamoDB, S3 while applying best practices for **scalability** and **cost optimization**.
- Built responsive front-end (React-JS based) for costumers, leveraging services like **AWS Cognito** and **AWS Amplify** for secure application access and authorization.
- Built serverless Streamlit Apps for ML solutions using **AWS Rekognition** with **CloudWatch** monitoring and real-time alerting for application health and performance, improving visibility into the system.

### Self-Employed

August 2016 – December 2018

Operations & Business Associate

- Prepared **cost estimates** and **technical documentation** for government infrastructure projects, supported tender preparation and road survey documentation for government entities like PWD, UIT, PHED.
- Developed** infrastructure models and technical drawings for construction projects using AutoCAD.
- Analyzed evolving business and improved process, helping adapt operational procedures to changing demands.

## CERTIFICATION

AWS Certified Cloud Practitioner

Valid till 2028

## EDUCATION

Malaviya National Institute of Technology

August 2020 - August 2022

M.Tech in Electronics & Communication Engineering

Jaipur, India

Government Engineering College Bikaner

August 2012 - August 2016

B.Tech in Electronics & Communication Engineering

Bikaner, India
